Before the outbreak of war (July, 1939), their number was 2,371,000. The increase of 149,200 during the war period (to March, 1944) included the normal increase of 89,200 male breadwinners (which might have been expected if war had not occurred) and an abnormal war-time increase estimated at 60,000.

The net number of men transferred from civil life to the Armed Forces and not returned to civil life as at March, 1944, was nearly 680,000 and as at June, 1944, 667,000.

FEMALES: The number of female breadwinners in July, 1939 (including women who were employers, self-employers and wage and salary earners, or temporarily unemployed) numbered 677,600. In March, 1944, the number was 820,500. The increase of 142,900 included the normal increase of 36,400 female breadwinners (which might have been expected if pre-war trends had continued) and an abnormal war-time increase of 106,500 females in gainful occupation (including Forces) who would not have been seeking gainful occupation but for war conditions.

The changes in numbers of breadwinners in the main grades are shown below:-

Monthly estimates of the number of wage and salary earners in civil employment (excluding rural workers and female domestics in private homes) are made through the use of Pay-Roll Tax statistics and direct returns of the Commonwealth Government employment.

The trend of employment since the outbreak of war is shown in the table below:-

(a) Includes all direct Government employment, viz., civilian employees of Commonwealth Government factories, civil & war departments & construction authorities, & of State, Semi-Government, Local Government & Allied Government Authorities.

(b) Revised since last issue.

Analysis of the figures of Government employment (civilians) indicates that the net increase since July 1939 of 122,900 persons has been made as follows:- War Departments, defence works construction and Allied Government services +83,900; Government factories +48,000; Other Commonwealth, State, Local and Semi-Government authorities -9,000.

Total Government employment reached a peak of 546,900 in August 1943, since when there has been a decline of 19,000.

Total civil employment (excluding rural and household domestic) reached a peak in November 1941 (1,952,300) following which there was a heavy decline in male employment as men were called up for the Armed Forces. Since the middle of 1943 there has been little change in male or female employment (excluding rural and household domestic).

During September, 1944, estimated total civil employment (excluding rural and females in private domestic service) increased by 1,400, made up of increases of 1,000 males and 400 females. Changes in the main industrial groups from August to September 1944, and a comparison with the distribution of employment by industries in earlier periods may be seen in Section C.

See Notes (a), (b), (c) and (d) to the table on page 3. (e) Comparable figures for August 1944 were published in Employment Bulletin No. 34. Employment in factories for August in Queensland and Australia as shown in Employment Bulletin No. 34 has been revised (males - 500, females - 300).

The above statistics relating to total employment are based on data from various sources, including Pay-Roll Tax returns and returns of Commonwealth Government employment.

PART III.  
PAY-ROLL TAX RETURNS

Figures of employment recorded on Pay-Roll Tax returns for Australia are given without any adjustment in the next table. The returns do not cover employees of the Commonwealth Government; employers who pay not more than £20 per week in wages do not make returns, and religious and public benevolent institutions and hospitals are also exempt. The proportion of all employees who are included varies from State to State, but in general the proportion of employees (other than those of the Commonwealth, those engaged in rural industries and female domestics in private households) in the Pay-Roll Tax returns is about 90 per cent. of the estimated total of males in employment, and about 80 per cent of the females.

Employers were classified for "industry" according to the industry in which they were predominantly engaged. The following table may be taken as indicating trends from month to month, but not as a guide to the absolute numbers employed in the respective industries.
